

860-0155V VACUUM COMPATIBLE ROTATION STAGE

- Continuous rotation
- Very compact design
- No need to use extra adapter plate
- Non vacuum version available
- Motorized version available

The main advantage of this precise rotation stage is that it has very compact dimensions and low-profile together with the great aperture in the middle.

This rotation stage has two modifications with different apertures: M27x1 or 30 mm. 860-0155V doesn't need additional adapter plate to be mounted on any surface as it has 3 M6 holes on bottom.

SPECIFICATIONS

Rotation range	360°
Sensitivity	0.4 arcmin
Reading accuracy	2 arcmin
Resolution	2 arcmin
Wobble	0.6 arcmin
Eccentricity	10 µm
Load capacity:	
Horizontal	8.0 kg
Radial	1.7 kg
Weight	0.55 kg
Rotation range	360°
Sensitivity	0.4 arcmin
