

810-0140

ANGLE BRACKET

Angle Bracket 810-0140 is ideally suited for orthogonally attaching Single Axis Translation Stage 860-0092-01 to a two-Axes Translation Stage 860-0092-02 or 860-0094. 810-0140 may as well be used to attach units of other models together or to the base surfaces. 810-0140 has holes to attach translators with M4 screws. It also has a hole of Ø10mm which can serve as a clear aperture.

Code	Material	Weight, kg	Price, EUR
810-0140	Black anodized aluminium	0.06	21
810-0140SS	Stainless Steel	1.13	49

- Designed to be used with:
 - Ultra Low Profile Steel Translation Stages 860-0092
 - Low Profile Aluminium Translation Stages 860-0094
