

**840-0240****TWO AXES TRANSLATION POLARIZER HOLDER****new**

Two Axes Translation Polarizer Holder 840-0240 accepts optics of 25,4 mm diameter or with additionally provided adapter can accommodate smaller than 1" (25.4 mm) optics. The rotation position (X axis) is indicated on 360° angular scale with a gradation of 2°. The rotation platform has a removable rod that allows continuous 360° rotation without obscuring the aperture. This removable rod can be fitted into any of the four holes (10°, 100°, 290°, 280°) on the perimeter of rotation platform.

Two axes (Y-Z) translation stage with 2 mm travel range is driven by two screws. Two axes translation polarizer holder has M4 hole on the bottom and can be fitted in different mounting systems. A retaining ring M27x1, two teflon rings and tightening key are included.
